PAC-MAN

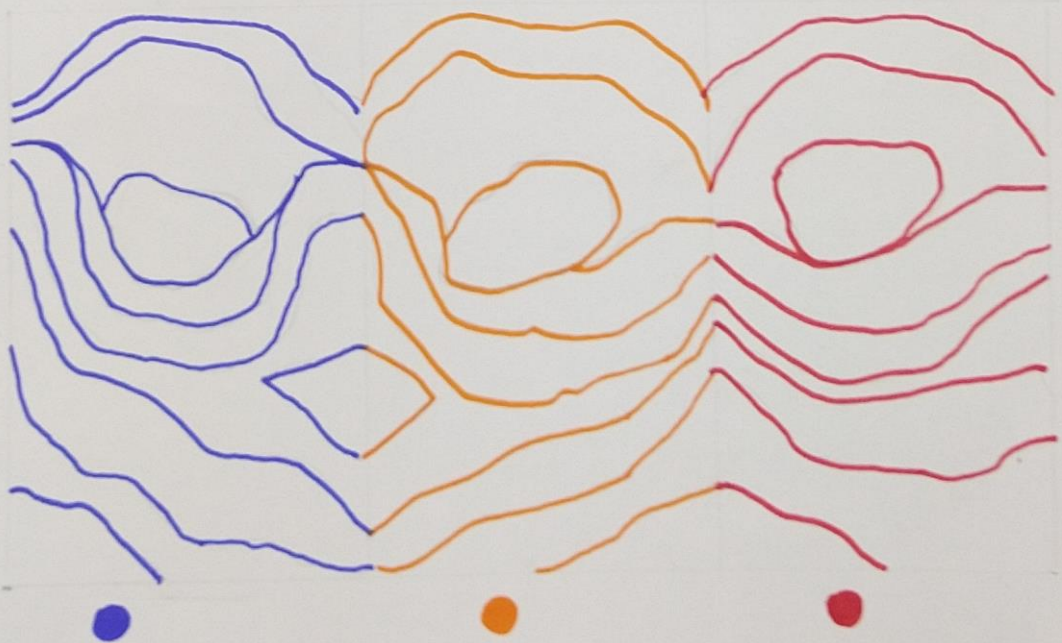

I have been inspired by the wobbliness of the circus mirrors which gives us the illusion to our body form, similarly I imagined it happening to shapes and lines

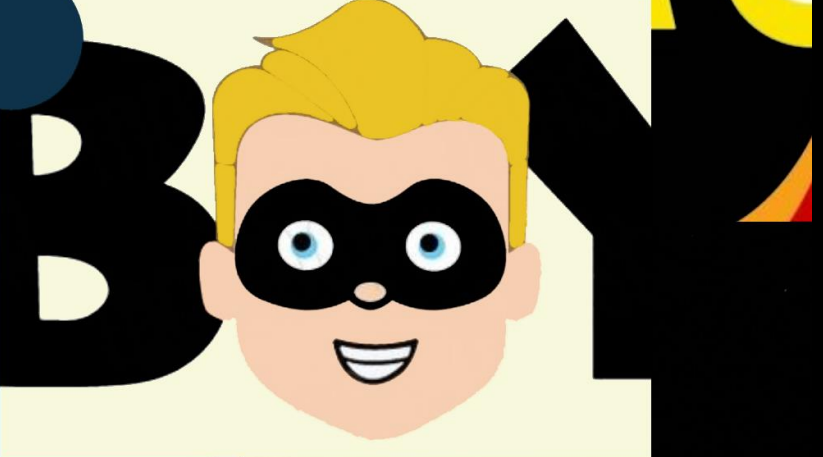

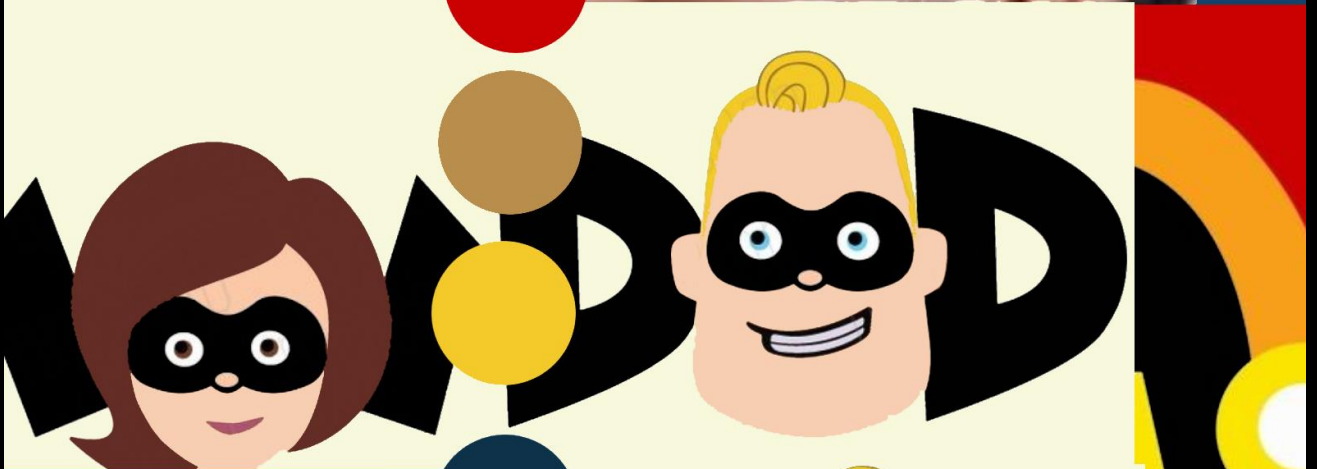

Set 1 (Distortion + packman game) → Design on back side of T-shirt  
In a rectangle (1/2 scale of original) which is 8 inches print  
Measurement → 4 inches x 2.5 inches

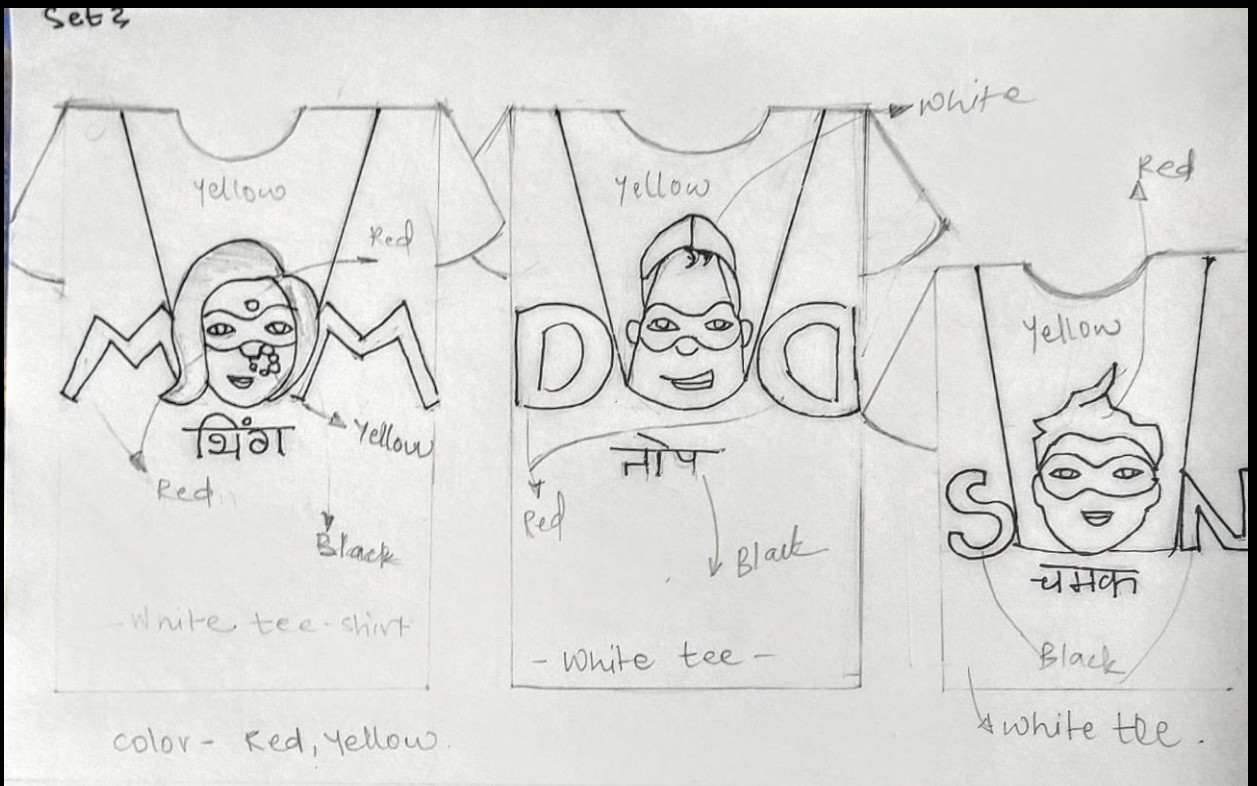

Look:-   Color:-    

Set 2 (Distortion + Lines) ~~Eye of inside out~~

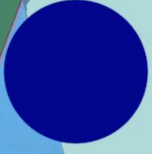

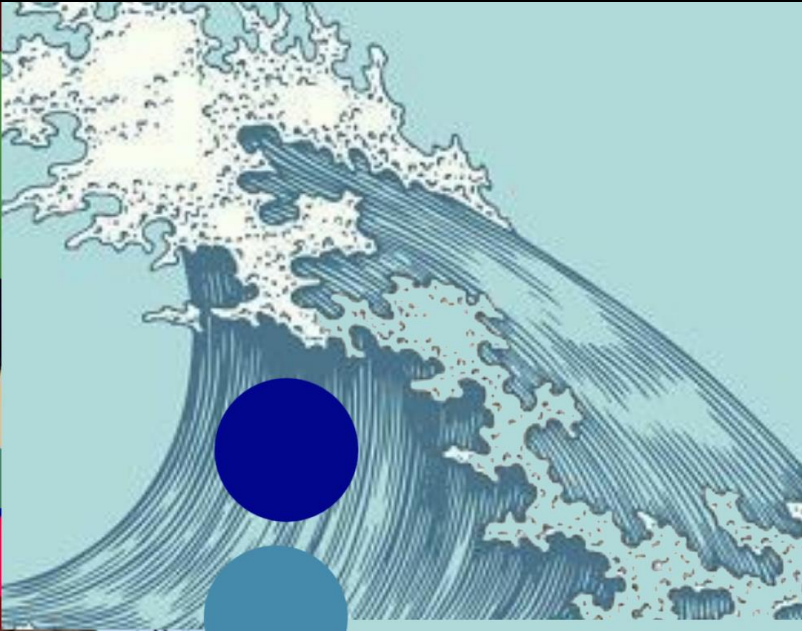

Here I choose super heroes cause they tend to have a bond which family shows . No matter they stick together. To this I give a Maharashtrian twist

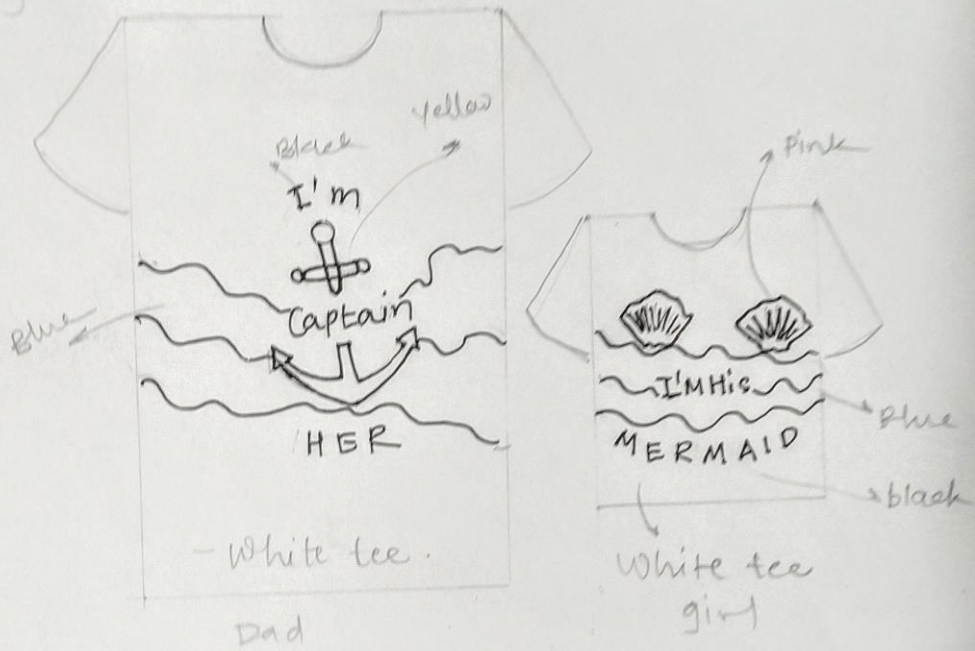

all marvel color scheme of  
yellow, red, blue.

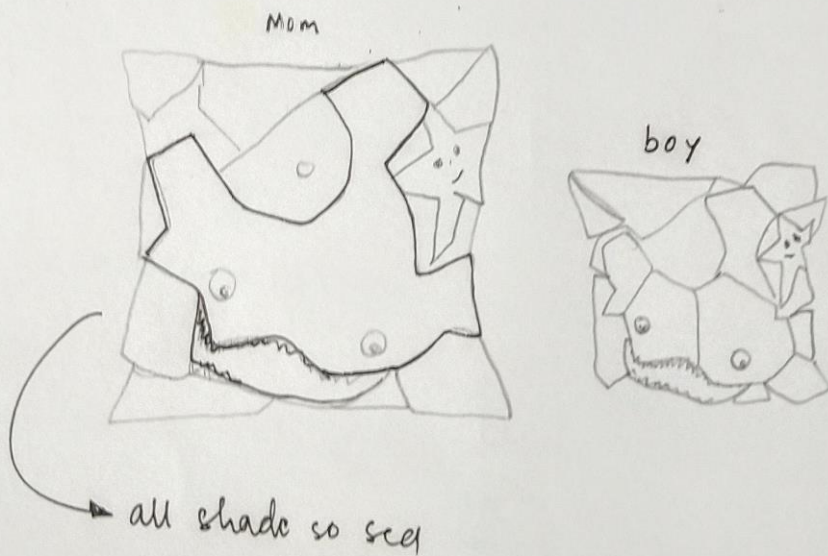

Keeping cubism as main inspiration I added the flair of sea in it just to break the dark and dull colour scheme of cubism, keeping in mind of the brightness and energetic families are.

set 5 single dad

set 6.. single mom

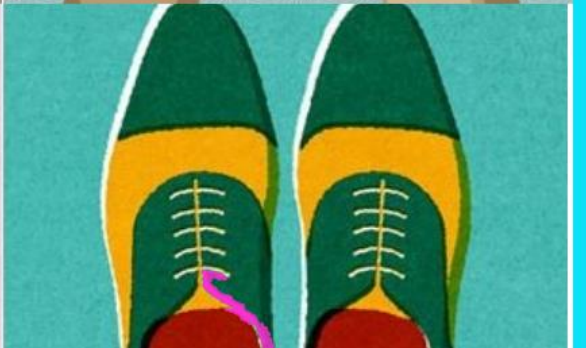

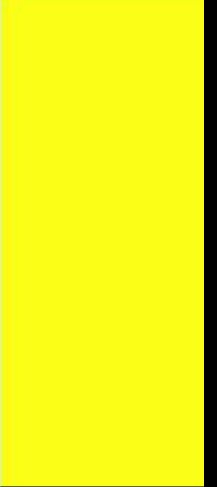

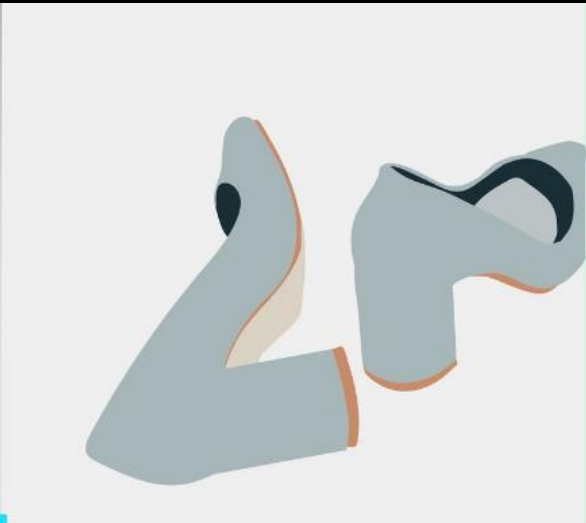

Since we know that it's all about connection and warmth that family gives us , the same is what I tried to convey .using sunrise color palette the wholesome peace is attended.

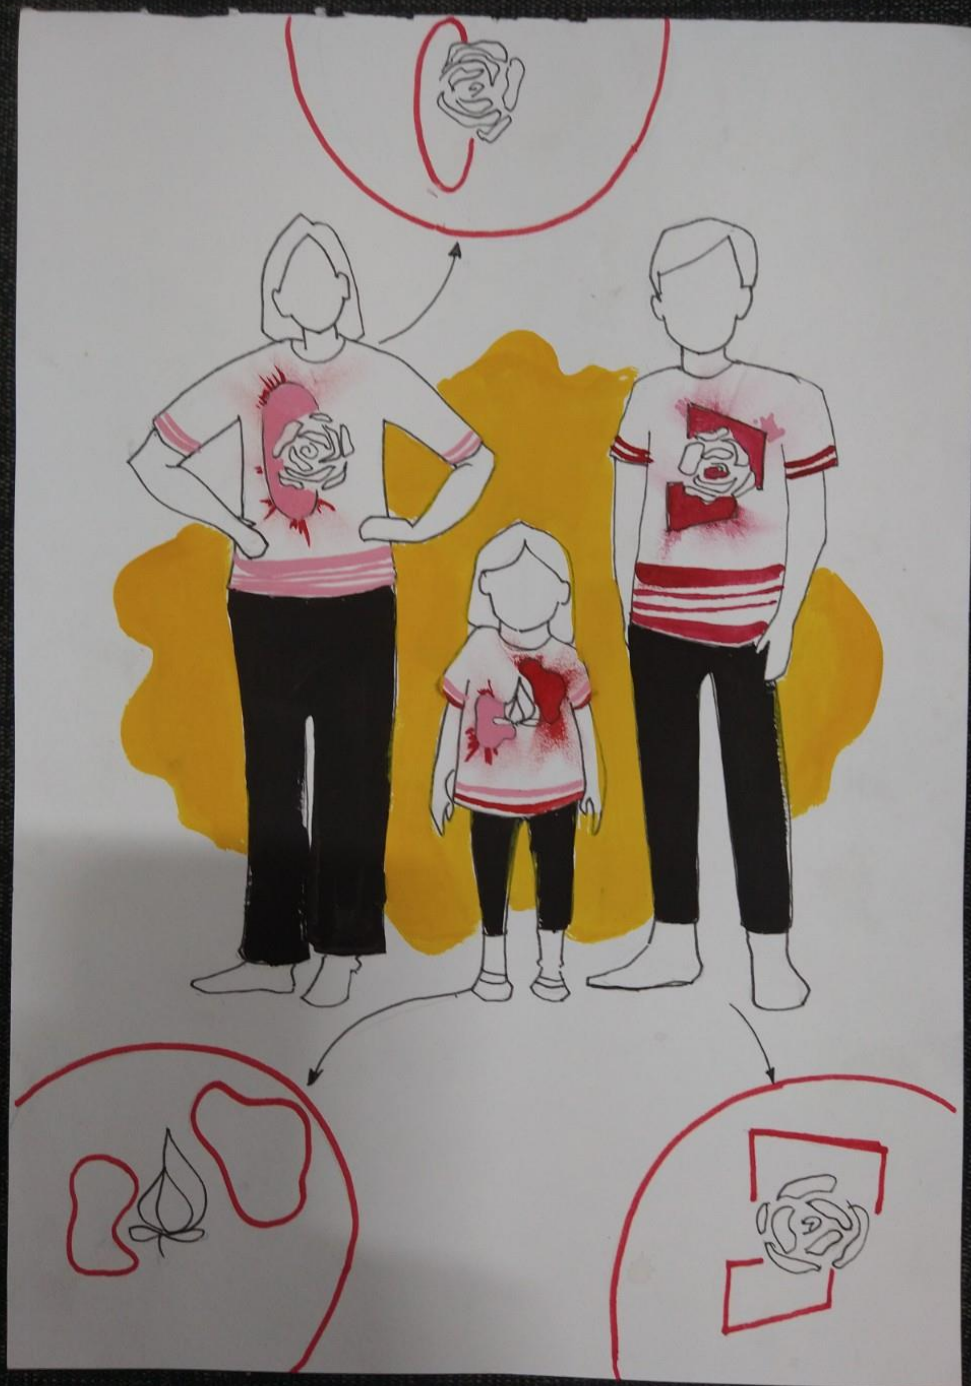

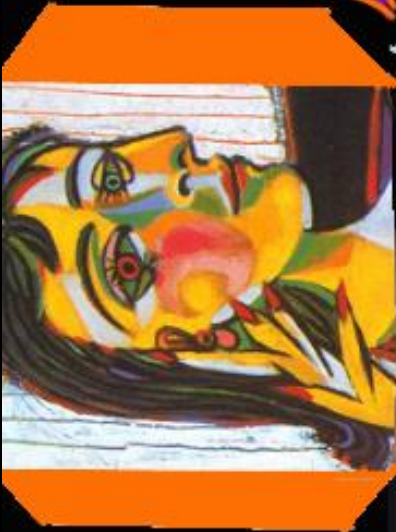

The thing that popped to me was indian parents and the chapal so I ended taking this print on the teeshirt. The colors usually are not been used by the aged people hence to break the stereotype and bring the young them out just like there kids I used neon colors

Many a times it's said that roses are feminine .But when we use them with some geometric and dynamic shapes it subdues the femininity and unisexsual

Keep in mind the age group of modernized youth I took this inspiration to be outrageous. Since this period of cubism have all the edgy shapes these will depict the edgyness in them

# Final two
